Below is information on downloading and installing western Washington Hydrology Model version 2 (WWHM2)

1- Downloading files
Download the latest files by clicking on the file names and save them in any drive or sub-folder. (These files are self-extracting zip files)

(a)- Download the latest version of WWHM2_(Month-Day-Year).exe
(b)- Download the county of your choice at the bottom of the web page.
(c)- Most recent patch (if any!) to update WWHM2.

2- Unzip (extract) the setup files
The setup files in 1(a) may be extracted and saved in any drive or sub-folder by double-clicking on "WWHM2_(Month-Day-Year).exe" and choosing to unzip. Three files will be extracted (setup.exe, SETUP.LST, wwhm.CAB).

3- Installing WWHM2
   (a)- Remove the previous version of WWHM2 from your PC by going to
          ["Start\Settings\Control Panel\Add-Remove Programs\WWHM2_"]
        and choosing to remove WWHM2.

   (b)- Installation
        i) Double-click on the "setup.exe" for installation of the latest version of
           WWHM2. It is preferred that you accept the default drive and sub-folder
           (C:\Program Files\WWHM2). (Do not install on a network drive)

        ii) Choose **"No to All"**, if you get the following message during the
            installation: [A file being copied is not newer than the file currently
            on your system. It is recommended that you keep your existing file..."]

4- Loading a county map
To load a county map in WWHM2, double-click on the county's name and choose "OK" then "Unzip".

WWHM2 is now ready to be launched. The program name is "wwhm.exe" and it resides in the "C:\Program Files\WWHM2" sub-folder. (The icon has a blue background with a picture of clouds and rain over it)

Computer Requirements
 - Windows 9x/ME/2000/XP with 50 MB uncompressed hard drive space
 - Internet access (only required for downloading program, not required for executing WWHM)
 - Pentium 2 or faster processor (desirable)
 - Color monitor (desirable)

Please call or email Foroozan Labib if you have any questions on the operation of the model or problems that you will find with the model.
